Projects

To-do (PERN) Github

REACT/BOOTSTRAP/NODE.JS/EXPRESS/POSTGRESQL, HEROKU

- Developed a full stack, single page, CRUD application for knowledge purposes using the PERN stack
- · Created a REST API with Node.js and Express that allows users to add, update, and delete items on the list
- Items are passed from the front-end to the server and stored in the PostgreSQL database

Quizler Github

REACT/TAILWINDCSS/OPENTRIVIADB API, GIMP, NETLIFY

- Developed a web app that allows users to take short quizzes for entertainment purposes using React Hooks, and TailwindCSS
- Retrieves the questions and answers from the OpenTriviaDB API
- Users can select a category and difficulty for the questions
- Users are given a set time to correctly answer as many questions as they can

O.E.C. Japanese Restaurant

Github

HTML5/CSS3. NETLIFY

• Created and implemented a potential front-end design idea for a local japanese restaurant's website using HTML5, and CSS3 Grid and Flexbox

Portfolio Github

HTML5/CSS3/JAVASCRIPT, NETLIFY

- · Created my own personal portfolio as an identity hub using HTML5, CSS3, and JavaScript
- Houses my personal information, projects, resume, and links to my social medias
